To Whom It May Concern,

The World Congress of Chemical Engineering (WCCE8) was held in Montréal, Québec, Canada from August 23–27, 2009.

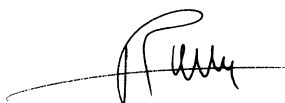

The presentations were accepted based on the following peer-review process: Following an open submission process where abstracts and manuscripts were submitted into the technical program symposia, all the abstracts and manuscripts were reviewed by at least 2 persons of the scientific committee. Manuscripts that were deemed as unacceptable by both reviewers were rejected and all others were accepted. Based on the quality of the accepted manuscripts they were selected for either oral or poster presentation. Format was also dependent upon the availability of time and the request by the author. The Technical Program Committee has emphasized that all accepted contributions, irrespective of the format, received the same exposure.

The contributed abstracts were published in the WCCE8 Program Book which is registered as ISBN 0-920804-44-6. The manuscripts and abstracts were included on a USB key which was also distributed to registrants at the congress.

Sincerely,

Jamal Chaouki, WCCE8 Technical Program Director

Philippe Tanguy, WCCE8 Congress Chair
